

Every drop
counts.
#save water.

Rand Water
is centered
on employment
creation and supporting
economic and sectors
by significantly stepping up the
production of relevant, scarce and
critical skills and in line with National
Skills Development Strategy III pillars.

Rand Water is one of the biggest water utilities in the world. It provides bulk potable water of superior quality to 12 million people in the economic heartland of South Africa. Since its inception in 1903, Rand Water has built a proud history of never failing to supply water to a continually growing economy. Johannesburg is one of the few cities not built on or near a sustainable river or dam, hence innovative solutions had to be engineered over the years to meet the challenge.

Graduate Internship Programme for the Built Environment (Fixed-term contract)

Rand Water in partnership with Govan Mbeki Local Municipality take pleasure in inviting suitably qualified and unemployed graduates to participate in a 3-year fixed-term contract programme in the following disciplines:

Discipline	Minimum Qualification	Numbers	E-mail
